Good practice score

The Good Practice Score helps patients to make a more informed choice when considering cross-border reproductive care. Based on the recommendations of the European Society of Human Reproduction and Embryology, the Good Practice Score embraces twenty factors which assess the suitability of a clinic for the delivery of services to international patients.

Equity in cross-border reproductive care

	Yes	No
Are treatment protocols at your clinic the same for both foreign and local patients?	●	
Is the same information provided to both foreign and local patients?	●	
Is the same counselling and support provided to both foreign and local patients?	●	
Are the same fees charged to both foreign and local patients?	●	

Is the screening of sperm and eggs for sexually transmitted disease and genetic disease the same for both foreign and local patients?	•	
Is the payment and compensation to donors the same for both foreign and local donors?	•	

Patient information

	Yes	No
Do patients receive clear information about necessary investigations and their cost, about waiting list times and the expected time they will have to spend outside their own country?	•	
Are patients given copies of their medical record when they return home?	•	
Is counselling and psychological support is available in a language understood by the patients?	•	
Are the relevant details of previous investigations and care in the home country requested from <u>all</u> patients?	•	
Is the appropriate relevant information given to the patients returning home in order to optimize their care at home?	•	
Is a report on the patient's investigations and treatment sent to the patient's physician in the home country or given to the patient to pass on?	•	
Does the clinic provide the name of their ombudsman or the person to whom complaints should be directed?	•	

Donors

	Yes	No	N/A
Do you comply with the EU tissues directive, with special regard to the screening process and the non-commercialization conditions?	•		
Do you contribute data to a national or international register of donors?		•	

Surrogacy

	Yes	No	N/A
Is single embryo transfer your sole practice?	•		
Do you provide legal advice (or access to legal advice) about local rules governing surrogacy?	•		

Embryo transfer

	Yes	No
Do you publish your policy on single versus multiple embryo transfer?		•
Do foreign patients follow the same stimulation protocol as local patients, taking into account age and previous stimulations?	•	
When donor oocytes are used, is embryo transfer limited to two embryos?	•
